Preface xiii

Contents xv

Chapter 1. Plenary session

Magnetotransport in semiconductor nanostructures
K.v. Klitzing 1

Long-range power-law correlations in condensed matter physics and biophysics
H.E. Stanley, S.V. Buldyrev, A.L. Goldberger, S. Havlin, C.-K. Peng and M. Simons 4

Exact results for the one dimensional asymmetric exclusion model
B. Derrida, M.R. Evans, V. Hakim and V. Pasquier 25

Deposition problems
S.F. Edwards 34

Vortex dynamics in superfluids and the Berry phase
D.J. Thouless, P. Ao and Q. Niu 42

X-ray scattering studies of liquid surfaces
P.S. Pershan 50

Transport by single and few electrons in GaAs mesoscopic structures
D.H. Cobden, A.S. Dzurak, M. Field, C.G. Smith, A.K. Savchenko, M. Pepper, D.A. Ritchie, J.E.F. Frost, G.A.C. Jones and D.G. Hasko 65

Transport anomalies in glasses
A. Bunde and P. Maass 80

High-T_c superconductivity: phenomenology and microscopics
G.M. Eliashberg 95

Persistent currents in mesoscopic rings
H.A. Weidenmüller 104

On the ubiquity of spin glass concepts and methods
M. Mézard 111

Effects of anisotropy and layering in the high-temperature superconductors
J.R. Clem 118

The bipolaron theory of high-temperature superconductors
N.F. Mott 127

Chapter 2. Disordered systems

Dynamics of surface roughening in disordered media
Z. Csahók, K. Honda, E. Somfai, M. Vicsek and T. Vicsek 136

Segregation in reaction–diffusion systems
H. Taitelbaum 155

Is diffusion limited aggregation scale invariant?
A. Coniglio 165

Was superlocalization observed on a fractal?
A. Aharony, O. Entin-Wohlman and A. Brooks Harris 171

Self-organized criticality with and without conservation
I.M. Jánosi and J. Kertész 179

Electric field induced pattern formation in interfacial metal colloid films
I. Aharoni-Hazan, S. Efrima, M. Deutsch and D.C. Rapaport 189

Anisotropic percolation and the *d*-dimensional surface roughening problem
S.V. Buldyrev, S. Havlin and H.E. Stanley 200

Random walk analysis of time-resolved transillumination measurements in optical imaging
A.H. Gandjbakhche, H. Taitelbaum and G.H. Weiss 212

Lévy walks in dynamical systems
J. Klafter, G. Zumofen and M.F. Shlesinger 222

High-field vs. low-field magneto-transport in a percolating medium
D.J. Bergman and A.K. Sarychev 231

Simulations of migration, fragmentation and coalescence of non-wetting fluids in porous media
P. Meakin, G. Wagner, J. Feder and T. Jøssang 241

How to reconcile classical nucleation theory with cluster–cluster aggregation
Z. Alexandrowicz 250

Two-state system in an oscillating field
M. Gitterman and J. Kiefer 258

Thickness and temperature dependence of subsidiary absorption thresholds in yttrium-iron-garnet thin films
A.V. Pomyalov, I. Laulicht and J. Barak 267

Chapter 3. High-T_c superconductivity

Hysteresis in vortex glass transitions of the first order
V.B. Geshkenbein, L.B. Ioffe and A.I. Larkin 278

The interplay between antiferromagnetism and superconductivity in disordered ultrathin high-T_c films
K.M. Beauchamp, T. Wang, G.C. Spalding and A.M. Goldman 287

Thermodynamics of vortices in layered superconductors and the dependence of T_c on anisotropy
B. Horovitz 296

On the possibility for flux penetration into a Campbell regime near the onset of irreversibility in high temperature superconductors
M. Konczykowski, Y. Wolfus, Y. Yeshurun and F. Holtzberg 305

Low field irreversibility in twinned and untwinned YBaCuO crystals
L. Krusin-Elbaum, L. Civale, F. Holtzberg and C. Feild 314

Penetration of periodic fields
J. Gilchrist 323

Temperature range for critical scaling behavior in YBCO thin films
J. Deak, M.J. Darwin and M. McElfresh 332

Vortices in high temperature superconductors: the statistical mechanics and dynamics of strings
G. Blatter, M.V. Feigel'man, V.B. Geshkenbein, A.I. Larkin and V.M. Vinokur 341

Temperature dependence of the Hall effect in high-temperature superconductors above and below T_c
D.M. Ginsberg and R.L. Dudey 351

Multivortex states in large pinning centers
B.Ya. Shapiro and I.B. Khalfin 357

Reaching the unreachable: critical scaling at the superconducting transition
M.B. Salamon, W. Lee, K. Ghiron, J. Shi, N. Overend and M.A. Howson 365

Vortex phases and dynamics in high-temperature and conventional amorphous superconductors
N.-C. Yeh, W. Jiang, D.S. Reed, U. Kriplani, F. Holtzberg, M. Konczykowski, C.C. Tsuei and C.C. Chi 374

Vortex dynamics and correlated disorder in high-T_c superconductors
V.M. Vinokur 384

Vortex dynamics in YBaCuO single crystals with point- and line-like defects – flux creep studies
J.R. Thompson, Y.R. Sun, D.K. Christen, L. Civale, A.D. Marwick and F. Holtzberg 395

Flux creep through the surface barrier and columnar defects in HTSC
L. Burlachkov 403

Angular dependence of the magnetization curves and interlayer Josephson coupling in $Bi_2Sr_2CaCu_2O_8$
L. Klein, E.R. Yacoby, Y. Yeshurun, M. Konczykowski and K. Kishio 413

Quantum tunneling of flux lines in superconductors
D. Prost, M. Konczykowski, I.A. Campbell and L. Fruchter 420

Josephson pancakes in layered superconductors
R.G. Mints and I.B. Snapiro 426

Chapter 4. Mesoscopic systems

Accumulation of dwell times in light diffusion
A. Lagendijk and B.A. van Tiggelen 433

Metal–insulator transitions between quantum Hall plateaus
H.L. Zhao and S. Feng 443

Backscattered indicatrix from surfaces with random impedance
V. Freilikher, M. Kaveh and I. Yurkevich 452

Optical absorption, disorder and the Anderson transition
Z. Ovadyahu 462

Distribution function of the intensity of optical waves in random systems
E. Kogan, R. Baumgartner, R. Berkovits and M. Kaveh 469

Conductivity peaks broadening in the quantum Hall regime
D.G. Polyakov and B.I. Shklovskii 476

Hopping spectroscopy in doped germanium near the metal–insulator transition
I. Shlimak, M. Kaveh, M.J. Lea, P. Fozooni, P. Stefanyi and A.N. Ionov 483

Condensation of states at the Landau levels and disorder-independent transport in a random system
M.Ya. Azbel' 491

Large orbital magnetism
B. Shapiro 498

Quantization of persistent currents in quantum dot at strong magnetic fields
Y. Avishai and M. Kohmoto 504

Renormalization of potential scattering in a weakly interacting one-dimensional electron gas
L.I. Glazman, D. Yue and K.A. Matveev 512

Persistent currents in interacting lattice models
M. Abraham and R. Berkovits 519

Mesoscopics in a strong perpendicular magnetic field
D.E. Khmelnitskii and M. Yosefin 525

The Thouless formula: From disordered to chaotic spectra
E. Akkermans 530

Chapter 5. Neural networks

Three fundamental concepts of the capacity of learning machines
V. Vapnik 538

Simulating infinite systems
M. Opper 545

Dynamics of learning and generalization in perceptrons with constraints
H. Horner 552

Generalization in large committee machines
J. Hertz and H. Schwarze 563

Solving optimization problems with mean field methods
C. Peterson 570

Bits and brains: Information flow in the nervous system
W. Bialek, M. DeWeese, F. Rieke and D. Warland 581

Networks of complex neurons
D. Horn 594

Equilibrium distributions of stochastic networks without detailed balance
A.C.C. Coolen and D. Sherrington 602

Electro-holographic artificial neural networks
A.J. Agranat 608

Statistical mechanics of generalization: new results for perceptrons
W. Kinzel 613

Probing the attractors in neural networks
K.Y.M. Wong 619

On optimal neural network learning
T.L.H. Watkin 628

Replica calculation of the Vapnik–Chervonenkis bound for the perceptron
A. Engel and C. Van den Broeck 636

Data compression and prediction in neural networks
R. Meir and J.F. Fontanari 644

On the combination of supervised and unsupervised learning
N. Intrator 655

Patterns of synchrony in a heterogeneous Hodgkin–Huxley neural network with weak coupling
D. Hansel and G. Mato 662

The binary perceptron and general aspects of non-self-averaged quantities
I. Kanter and M. Shvartser 670

Chapter 6. Physics at interfaces

Uniaxial incommensurate phases at the Au(111) electrode
J. Wang, G.M. Watson and B.M. Ocko 679

Search for perfectly ordered dense monolayers
M. Goldmann, P. Nassoy and F. Rondelez 688

Capillary waves on the liquid–vapour interface, and propagation near boundaries
D. Beaglehole 696

Thin liquid layers in shear: non-Newtonian effects
Y. Rabin and I. Hersht 708

Thin films of diblock copolymers: windows into bulk and reduced dimensional phenomena
T.P. Russell, A.M. Mayes and P. Bassereau 713

Monte Carlo simulation of polymers at interfaces
K. Binder 722

Studies of thin smectic C* films by X-ray reflectivity
O. Marinov, E. Olbrich, G. Cohen, I. Entin and D. Davidov 730

Surfactant–polymer interactions in soap films
O. Krichevsky and J. Stavans 743

A new surface phase in liquid normal-alkanes
X.Z. Wu, B.M. Ocko, E.B. Sirota, S.K. Sinha and M. Deutsch 751

Two-dimensional dye crystals with controllable optical properties
S. Kirstein, V. Bliznyuk and H. Möhwald 759

Role of interface scattering on the giant magnetoresistance of magnetic multilayers
N. Wiser 770

List of speakers 777

List of contributors 779
